### DETAILED ACTION

Applicant's preliminary amendment filed on 13 February 2006 is acknowledged and entered. Following the amendment, claim 14 is amended.

Currently, claims 1-23 are pending.

#### Species Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Two groups of species elections are required:

1. A single Gram-negative bacterium selected from:

(a) *Escherichia coli*, (b) *Pseudomonas* sp., (c) *Enterobacter* sp., (d) *Campylobacter* sp., and (e) *Vitreoscilla* sp..

2. A single polypeptide of interest selected from:

(a) an interferon, (b) an interleukin, (c) a growth hormone, (d) a growth factor, (e) a cytokine, (f) an enzyme, (g) an enzyme inhibitor, and (h) an antibody.

The claims are deemed to correspond to the species listed above in the following manner:

*E. coli*: claims 8 and 9,

*Pseudomonas* sp., *Enterobacter* sp., *Campylobacter* sp., and *Vitreoscilla* sp.: claim 8.

an interferon: claims 10-23,

an interleukin, a growth hormone, a growth factor, a cytokine, an enzyme, an enzyme inhibitor, and an antibody: claim 10.

The following claim(s) are generic: claim 1 is generic for group 1 species; and claim 7 is generic for group 2 species.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features because: with respect to group 1 species, each of the five bacteria has distinct properties and growing conditions; and with respect to group 2 species, each of the polypeptides of interest has a distinct structure and functional properties, each from each other; thus there is no unifying technical feature within the meaning of PCT Rule 13.2 among the species within each group, thus, the species do not relate to a single invention concept within the meaning of PCT Rule 13.1.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species (or more as applicable) from those set forth above to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.**

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
